

Initial 16 Collators List

The following is a directory of the 16 collators that comprise KILT's Initial Collator Programme. These descriptions were provided by each entity and are in alphabetical order with no preferences implied. KILT Protocol does not recommend collators, does not profit from this list and is not responsible for the work done by collators. Instead, the list is a resource for the community, to provide background information for each collator.
